

SPRING 2007

- Jan. 12 Making faces: the role of neural crest cells in craniofacial development and congenital | birth defects such as Treacher Collins syndrome
Paul Trainor, PhD hosted by David Threadgill
Assistant Investigator, Stowers Institute for Medical Research
- Jan. 26 Male germ cell development in *Drosophila*
Julie Brill, PhD hosted by Mark Peifer
Scientist, Program in Developmental and Stem Cell Biology
The Hospital for Sick Children at the University of Toronto
- Feb. 2 Stem Cells and developmental pathways
Janet Rossant, PhD hosted by Developmental Biology Student Speaker Committee
Chief of Research, The Hospital for Sick Children at the University of Toronto
- Feb. 16 Cell Biology of Neuron in *Drosophila*
Akira Chiba, PhD hosted by Steve Rogers
Associate Professor, Cell and Developmental Biology, Entomology,
University of Illinois at Urbana-Champaign
- Mar. 2 The role of autophagy in cell survival and cell death
Eric Baehrecke, PhD hosted by Steve Rogers
Associate Professor, Center for Biosystems Research,
University of Maryland Biotechnology Institute
- Mar. 23 Epigenomic landscape of human centromeric regions
Beth Sullivan, PhD hosted by Rosann Farber
Assistant Professor, Molecular Genetics and Microbiology, Duke University
- Apr. 27 Membrane organization in tissue morphogenesis and tumorigenesis
Andrea McClatchey, PhD hosted by Bob Duronio
Associate Professor of Pathology, Massachusetts General Hospital Cancer Center
- May 4 Epigenetics and Promoter Occlusion in tissue-specific expression from a dual promoter gene in the mouse
Richard Moran, PhD hosted by Bernard Weissman
Professor of Pharmacology and Toxicology, Virginia Commonwealth University
Associate Director for Basic Research, Massey Cancer Center
